ABOUT ME

Visit my website

Strategic full-stack engineer who interrogates every requirement, builds high performance JavaScript + Java platforms, and delivers measurable results that move the metrics that matter.

EDUCATION

25-Week Full-Stack Coding Bootcamp (Java & JavaScript) {
Code for All, 2024
Completed an intensive and immersive program, gaining hands-on experience in building scalable web applications using both front-end and back-end technologies.
}

Degree in Design (Half completed) {
University of Aveiro, 2017
I explored various aspects of design but was drawn to the structured problem-solving and immediate feedback of programming. My design background enhances my front-end work, particularly in user experience and interface design.
}

PROJECTS

My Personal Portfolio (SPA){

A responsive portfolio built with React, featuring GitHub API integration to showcase repositories, dynamic animations, and a modern design. Includes multilingual support via Google Translate.
}

All-In-One Business Suite {

All-in-one business management platform built with Java, JavaScript, and SQL for seamless control of inventory, customer, procurement, and employee operations, designed to streamline and automate core business processes.
}

EXPERIENCE

Digital Communications & Web Specialist {
Cértoma - Wood Processing Industry
June 2023 - Present
Manage company communication, website content, and product photography.
Develop a stock management application and lead social media strategies, enhancing brand presence across digital platforms
}

Vice President for Communication and Image {
Academic Association of the University of Aveiro
Jan 2019 - Jan 2020
Led internal and external communications, implementing new strategies.
}

Sales Assistant {
Vodafone S.A. Portugal
Feb 2018 - Sept 2020
Achieved strict monthly sales targets in a high-pressure environment.
}
